StarpointWare FL Dev Team Internal Use Only

Froth Link Project

The team needs to be properly prepared for the early testing launch of the site coming up on June 5th. Below are the standardized tester login format and developer login credentials for the site. These should not be shared.

Test User Login

Username: testUser####

Password: gateLog##

Developer Login

Username: f#^sp(b_324hA

Password: uu7T3@b=mz1$*

Additional Notes:

- We’re going to need to add an additional login for the translation team that gives access to most of the site but not developer access.
- Before our next meeting with the Gateway FL dev team we need to have a more visually appealing site. The UI team is expected to pick up the slack and get to work.
